NEUROBIOLOGY OF AGING

VOLUME 1 NUMBER 1 SUMMER 1980

## *CONTENTS*

**Senescent changes in a neurobiological model system: Cerebellar Purkinje cell electrophysiology and correlative anatomy.** ROGERS, J., M. A. SILVER, W. J. SHOEMAKER and F. E. BLOOM ..... 3

**Brain cholinergic dysfunction and memory in aged rats.** LIPPA, A. S., R. W. PELHAM, B. BEER, D. J. CRITCHETT, R. L. DEAN and R. T. BARTUS ..... 13

**Choline chloride effects on memory in the elderly.** MOHS, R. C., K. L. DAVIS, J. R. TINKLENBERG and L. E. HOLLISTER ..... 21

**Age-related changes in dopamine, LHRH and somatostatin in the rat hypothalamus.** HOFFMAN, G. E. and J. R. SLADEK, JR. ..... 27

**Aging, memory, and the cholinergic system: A study of dichotic listening.** DRACHMAN, D. A., D. NOFFSINGER, B. J. SAHAKIAN, S. KURDZIEL and P. FLEMING ..... 39

**Localization of cellular changes within multimodal sensory regions in aged monkey brain: Possible implications for age-related cognitive loss.** BRIZZEE, K. R., J. M. ORDY and R. T. BARTUS 45

**Vasopressin and conditioned flavor aversion in aged rats.** COOPER, R. L., M. C. McNAMARA and W. G. THOMPSON ..... 53

**Age-related alterations in the rodent brain cholinergic system and behavior.** STRONG, R., P. HICKS, L. HSU, R. T. BARTUS and S. J. ENNA ..... 59

**Norepinephrine uptake in aging adrenergic nerve terminals.** HOFFMAN, D. W., M. MARCHI and E. GIACOBINI ..... 65

**Computed tomography evaluations of brain-behavior relationships in senile dementia of the Alzheimer's type.** DE LEON, M. J., S. H. FERRIS, A. E. GEORGE, B. REISBERG, I. I. KRICHEFF and S. GERSHON ..... 69

**Magnitude estimates of amino acids for young and elderly subjects.** SCHIFFMAN, S. S. and T. B. CLARK, III ..... 81

**$^3$H-Amphetamine concentrations in the brains of young and aged rats: Implications for assessment of drug effects in aged animals.** TRUEX, L. L. and M. J. SCHMIDT ..... 93

**Manuscripts for Forthcoming Issues** ..... 97

**Calender of Upcoming Events** ..... 98

**Announcements** ..... 99

NEUROBIOLOGY OF AGING

VOLUME 1 NUMBER 2 WINTER 1980

## CONTENTS

*EDITORIAL COMMENT* ..... 109

**Visual event-related potentials and depression in the elderly.** LITZELMAN, D. K., L. W. THOMPSON, H. J. MICHALEWSKI, J. V. PATTERSON and T. E. BOWMAN 111

**Age-related neostriatal alterations in the rat: Failure of L-DOPA to alter behavior.** JOSEPH, J. A., C. FILBURN, S. P. TZANKOFF, J. THOMPSON and B. T. ENGEL ..... 119

**Positron emission tomography in the study of aging and senile dementia.** FERRIS, S. H., M. J. DE LEON, A. P. WOLF, T. FARKAS, D. R. CHRISTMAN, B. REISBERG, J. S. FOWLER, R. MACGREGOR, A. GOLDMAN, A. E. GEORGE and S. RAMPAL 127

**Visual acuity and foveal cone density in the retina of the aged rhesus monkey.** ORDY, J. M., K. R. BRIZZEE and J. HANSCHE ..... 133

**Positive feedback by ovarian hormones on prolactin and LH in old versus young female rats.** HUANG, H. H., R. W. STEGER, W. E. SONNTAG and J. MEITES ..... 141

**Memory deficits in aged cebus monkeys and facilitation with central cholinomimetics.** BARTUS, R. T., R. L. DEAN and B. BEER ..... 145

**Pituitary and hypothalamic concentration of met-enkephalin in young and old rats.** KUMAR, M. S. A., C. L. CHEN and H. H. HUANG ..... 153

**Cardiovascular, sympathetic and adrenal cortical responsiveness of aged Fischer-344 rats to stress.** CHIUEH, C. C., S. M. NESPOR and S. I. RAPOPORT ..... 157

**Immunoglobulins, cognitive status and duration of illness in Alzheimer's disease.** COHEN, D., C. EISDORFER, P. PRINZ, J. LEVERENZ and M. DAVIS ..... 165

**Aging in rodent brain: Alteration in astrocyte population.** UNSWORTH, B. R. and L. H. FLEMING ..... 169

**Reduced febrile responses to peripheral and central administration of pyrogen in aged squirrel monkeys.** CLARK, S. M., J. T. GEAN and J. M. LIPTON ..... 175

*CALENDAR OF UPCOMING EVENTS* ..... 181

*MANUSCRIPTS FOR FORTHCOMING ISSUES* ..... 183

*ANNOUNCEMENTS* ..... 184

## Aims and Scopes

*Neurobiology of Aging* will publish the results of multidisciplinary studies in physiology, endocrinology, biochemistry, neurology, anatomy, pharmacology, and behavior in which the primary emphasis involves central nervous system changes with age. A limited number of relevant reviews and theoretical articles, results of symposia, more comprehensive studies as monograph supplements, and brief communications which describe a new method, technique, or apparatus, and results of experiments which can be reported briefly will also be published. Articles will be published in English.

## INSTRUCTIONS TO AUTHORS

All manuscripts should be sent to the Editor-in-Chief for review and processing.

*General Form.* (1) Manuscripts should be submitted in triplicate and should be typewritten, double spaced with wide margins on good quality paper. (2) The title page should contain: title of paper; author(s); laboratory or insitution of origin with city, state, zip code, and country; complete address for mailing proofs; a running head not to exceed 50 characters including spaces between words. (3) References, footnotes, and legends for illustrations should be typed on separate sheets, double spaced. (4) Illustrations (unmounted photographs) should be identified on the reverse with figure number and author(s) name; when necessary the top should be clearly marked. (5) Each table should be typed on a separate sheet and double spaced. (6) All dimensions and measurements must be specified in the metric system. Standard nomenclature, abbreviations and symbols, as specified by Royal Society Conference of Editors. Metrication in Scientific Journals, *Am. Scient.* **56**: 159–164, 1968, should be used throughout. (7) Italics should not be used for the purpose of emphasis. (8) *Brief Communications.* Brief research articles and descriptions of a new method, technique, or apparatus should be restricted to six typewritten pages including references and should not contain more than one figure and one table or two figures or two tables.

*Title.* The title should not be longer than 85 characters, including spaces between words.

*Length of Paper.* The Editors insist upon clear, concise statement of facts and conclusions.

*Abstract.* Each paper submitted must be accompanied by an abstract, which does not exceed 170 words and must be suitable for use by abstracting journals. Abstracts should be prepared as follows:

> EVANS, B. K., S. ARMSTRONG, G. SINGER, R. D. COOK AND G. BURNSTOCK. *Intracranial injection of drugs: Comparison of diffusion of . . .* PHARMAC. BIOCHEM. BEHAV. Marked differences in extent of diffusion have been. . .

A list of from 3–12 (or more) words or short phrases suitable for indexing terms should be typed at the bottom of the abstract page accompanying the manuscript. These terms will be printed with the paper at the end of the abstract.

*Drugs.* Proprietary (trademarked) names should be capitalized. The chemical name should precede the trade, popular name, or abbreviation of a drug the first time it occurs.

*Footnotes.* Title page footnotes should be numbered consecutively. Text footnotes should not be used, the material should be incorporated into the text. Table footnotes: see *Tables* (b).

*References.* Literature cited should be numbered in brackets in text (only one reference to a number) and listed in alphabetical order on a separate sheet at the end of the manuscript. *Do not recite names of authors within the text.* Journal citations in the reference list should contain the following: (a) surnames and initials of all authors (surname of first author precedes initials; initials precede surnames of all co-authors); (b) title of article; (c) journal title abbreviated as listed in the 4th edition of the *World List of Scientific Periodicals*; (d) volume, inclusive pages, and year. Example:

> 1. Miller, M., J. Leahy, F. McConville, P. J. Morgane and O. Resnick. Utilization f $^{14}$C-tyrosine in brain and peripheral tissues of developmentally protein malnourished rats. *Brain Res. Bull.* **3**: 681–686, 1978.

Book references should be in the following order: author, title, city of publication, publisher, year, and pages. Example:

> 1. Mello, N. K. Behavioral studies of alcoholism. In: *The Biology of Alcoholism, Vol. 2, Physiology and Behavior*, edited by B. Kissin and H. Begleiter. New York: Plenum Press, 1972, pp. 219–291.
> 2. Myers, R. D. *Handbook of Drug and Chemical Stimulation of the Brain.* New York: Van Nostrand Reinhold Company, 1974.

Citations such as "Unpublished observations," "Personal communication," "Manuscript in preparation," "To be published," should not be entered in the list of References, but may be noted in the text without serial numbers, in parentheses.

*Illustrations.* (a) Prepare for use in a single column width (8.4 cm) or double column width (17.4 cm) whenever possible. (b) All drawings for reduction to a given size should be drawn and lettered to the same scale. (c) All illustrations should be referred to as figures and numbered in Arabic numerals. (d) Lettering should be done in India ink or some suitable transfer lettering process and must be proportionate to the size of the illustrations if it is to be legible after reduction. Free hand or typewritten lettering is not acceptable. Lettering should be sized so that its smallest elements (subscripts and superscripts) will be readable when reduced. (e) When possible all lettering should be within the framework of the illustration; likewise the key to symbols should be on the face of the chart. The following standard symbols should be used as they are easily available to the printer: ● ○ ■ □ ◆ ◇ ▲ △ ▼ ▽ ★ ☆ (f) Actual magnification of all photomicrographs should be given. (g) Sharply contrasting unmounted photographs of figures on glossy paper are required. (h) For morphological studies with illustrative material, authors should submit manuscripts in triplicate. Mounted glossy prints will be acceptable. At the time of printing, originals will be returned to the senior author.

*Tables.* (a) Each table should have a brief heading; explanatory matter should be in footnotes, not as part of the title. (b) Table footnotes should be indicated in the body of the table in order of their appearance with the following symbols: * † ‡ § ¶ # **, etc. (c) Tables must not duplicate material in text or illustrations. (d) Vertical rules should be omitted. (e) Short or abbreviated column heads should be used. (f) Statistical measures of variation, SD, SE, etc., should be identified. (g) Analysis of Variance Tables should not be submitted but significant F's should be incorporated where appropriate within the text. The appropriate form for reporting F values is: $F(11,20)=3.05$, $p<0.01$.

*Formulas and Equations.* Structural chemical formulas, process flow-diagrams, and complicated mathematical expressions should be kept to a minimum. Usually chemical formulas and flow-diagrams should be drawn in India ink for reproduction as line cuts.

All subscripts, superscripts, Greek letters, and unusual characters must be clearly identified.

*Anesthesia.* In describing surgical procedures on animals, the type and dosage of the anesthetic agent should be specified. Curarizing agents are not anesthetics; if these were used, evidence must be provided that anesthesia of suitable grade and duration was employed.

*Proofs.* Corrections to the proofs must be restricted to printer's errors only. Other than these, any other alterations will be charged to the author.

*Reprints.* Each author will receive with his galley proofs a reprint order form which must be completed and returned with the proofs. Late orders cannot be filled since reprints are run at the time the Journal is printed. For individual articles, 25 free reprints will be provided.

*Copyright.* Publications are copyrighted for the protection of the authors and the publisher. A Transfer of Copyright Agreement will be sent to the author who submits the manuscript. The form must be completed and returned to the publisher before the article can be published.
